Contents of Vol. 108

Part 1

| | |
|--|-----|
| C. H. S. CAMERON, D. L. GARDNER and R. B. LONGMORE. The preparation of human articular cartilage for scanning electron microscopy | 1 |
| D. L. MISELL. Contrast enhancement by changing the objective lens focal length | 13 |
| R. M. ALBRECHT, D. H. RASMUSSEN, C. S. KELLER and R. D. HINSBILL. Preparation of cultured cells for SEM: air drying from organic solvents | 21 |
| A. ARMIGLIATO, G. G. BENTINI and G. RUFFINI. Detection of ultra-soft X-rays with a variable geometry proportional counter fitted to a transmission electron microscope (TEM) | 31 |
| BARBARA J. WARD and JOSEPHINE A. GLOSTER. Lipid losses during processing of cardiac muscle for electron microscopy | 41 |
| J. R. HARRIS and J. KERR. Contrast enhancement of negatively stained macromolecules and biomembranes by single sideband phase contrast interference | 51 |
| K. S. CHANG and F. A. L. DULLIEN. Section diameter method for non-spherical objects | 61 |
| RICHARD W. HOROBIN and ANNETTE TOMLINSON. The influence of the embedding medium when staining for electron microscopy: the penetration of stains into plastic sections | 69 |
| M. J. NASIR. X-ray analysis without the need for standards | 79 |
| S. R. BIELKE, R. B. NAGLE, B. F. TRUMP and R. E. BULGER. Scanning electron microscopy of renal vascular casts | 89 |
| <i>Short Technical Notes</i> | |
| VICTOR B. EICHLER and PATRICIA W. TAYLOR. A new metachromatic stain technique for paraffin-embedded neural tissue using thionin | 97 |
| R. D. A. LANG, P. CROSBY and A. W. ROBARDS. An inexpensive spray-freezing unit for preparing specimens for freeze-etching | 101 |
| Book Reviews | 105 |

Part 2

Invited Review

- D. B. WILLIAMS and J. W. EDINGTON. High resolution microanalysis in materials science using electron energy loss measurements 113
- W. GALBRAITH and G. B. DAVID. An aid to understanding differential interference contrast microscopy: computer simulation 147
- G. H. HAGGIS, E. F. BOND and R. G. FULCHER. Improved resolution in cathodoluminescent microscopy of biological material 177
- DAVID C. JOY, DENNIS M. MAHER and ANTHONY G. CULLIS. The nature of defocus fringes in scanning-transmission electron microscope images 185
- D. A. FAREBROTHER and DIANNE M. CREASY. Wholebody autoradiography: a β -radioluminescence method for detecting tritium 195
- E. RONANDER and S. KRITZINGER. Two-Shockley unfaulting of two- and three-layer faulted defects 201
- E. ROTHWELL and D. R. BICKHAM. The application of optical microscopy to studies of dust filtration. II. Specimen preparation techniques for analysing the distribution of dusts in filter fabrics 211

Short Technical Notes

- WILLIAM D. COHEN. Simple magnetic holders for critical point drying of microspecimen suspensions 221
- R. L. ALSTON and L. STANBRIDGE. A standard field area frame for use in automatic image analysis 227
- Book Reviews 229

Part 3

| | |
|--|-----|
| P. E. CHAMPNESS, G. CLIFF and G. W. LORIMER. The identification of asbestos | 231 |
| D. LANSING TAYLOR and ROBERT M. ZEH. Methods for the measurement of polarization optical properties. I. Birefringence | 251 |
| Y. MURATA, J. R. FRYER and T. BAIRD. Molecular image of copper phthalocyanine | 261 |
| J. M. N. BOSS and R. G. W. MAYS. Critical evaluation of histogram densitometry of Feulgen-stained normal human lymphocyte nuclei | 277 |
| J. M. N. BOSS, R. C. L. FENELEY and R. G. W. MAYS. Modes of chromatin packing in Feulgen-stained normal and malignant uro-epithelial cell nuclei, and in lymphocytes, in relation to DNA content | 291 |
| K. P. DINGEMANS and K. P. LETTINGA. Modifications to an LKB Pyramitome | 301 |
| J. R. J. BAKER and T. C. APPLETON. A technique for electron microscope autoradiography (and X-ray microanalysis) of diffusible substances using freeze-dried fresh frozen sections | 307 |
| K. SMITH and P. D. LUTHER. Problems associated with particulate contamination of cell cultures with relation to ultra-thin sectioning techniques | 317 |
| D. C. SIGEE. A resin slide technique to select fixed embedded cells for transmission electron microscopy | 325 |

Short Technical Notes

| | |
|--|-----|
| R. B. BOYD and R. E. COALSON. Making fusible metal casts of previously fixed lung material | 331 |
| L. R. SWENEY, N. J. LAIBLE and B. L. SHAPIRO. Some methods for more efficient processing of SEM specimens | 335 |
| RAM S. VERMA and HARVEY DOSIK. An improved method for photographing fluorescent human chromosomes | 339 |
| R. D. B. FRASER, T. P. MACRAE, E. SUZUKI and C. L. DAVEY. Image processing of electron micrographs of deformed filaments | 343 |
| A. CROSSLEY. A versatile multi-specimen holder for processing and critical point drying of materials for examination in the scanning electron microscope (SEM) | 349 |

Index of subjects

- Air drying of cultured cells, 21
- Articular cartilage, human, preparation of, 1
- Asbestos, identification of, 231
- Autoradiography, technique for electron microscopy, 307
- Autoradiography, whole body, method for detecting tritium, 195
- Biomembranes, negatively stained, contrast enhancement, 51
- Birefringence, measurement of polarization optical properties, 251
- Cartilage, human, 1
- Casts, metal, fusible, of previously fixed lung material, 331
- Casts, renal, vascular, 89
- Cathodoluminescence microscopy, improved resolution, 177
- Cell cultures, problems with particulate contamination, 317
- Cells, cultured, preparation of, for SEM, 21
- slide technique to select for TEM, 325
- Chromosomes, fluorescent, human photography of, 339
- Chromatic packing, modes of, in relation to DNA content, 291
- Computer simulation, aid to DIC microscopy, 147
- Contamination, particulate, of cell cultures, 317
- Contrast enhancement, by changing objective lens focal length, 13
- of negatively stained macromolecules, 51
- Copper phthalocyanine, molecular image of, 261
- Counter, variable geometry proportional, for a TEM, 31
- Critical point Drying, simple magnetic holders for, 221
- versatile multi-specimens holder for, 349
- Defects, faulted, unfauling of, 201
- Differential interference microscopy, (DIC) computer simulation, 147
- DNA content, modes of chromatic packing, in relation to, 291
- Dust filtration, application of optical microscopy to, 211
- Electron microscopy, autoradiography and X-ray microanalysis of diffusible substances, 307
- lipid losses, during processing of muscle, 41
- penetration of stains into plastic sections, 69
- Energy loss measurement in high resolution microanalysis, 113
- Fabrics, filter, analysis of distribution of dust in, 211
- Feulgen-stained cell nuclei and lymphocytes, 291
- Feulgen-stained nuclei, histogram densitometry of, 277
- Field area frame for automatic image analysis, 227
- Filaments, deformed, image processing of micrographs of, 343
- Fluorescent human chromosomes, improved method for photographing, 339
- Freeze-dried, fresh, frozen sections, technique for autoradiography, 307
- Freeze-etching, inexpensive spray-freezing unit for, 101
- Fringes, nature of defocus, 185
- High resolution microanalysis in materials science, 113
- Histogram densitometry, critical evaluation of, 277
- Holders, magnetic, for CPD, 221
- versatile multi-specimen, for processing materials, 349
- Image analysis, automatic, standard field area frame, 227
- Image processing of micrographs of deformed filaments, 343
- Lens, objective, contrast enhancement by change of local length, 13
- Lung material, previously fixed, fusible metal casts of, 331
- Lymphocyte nuclei, 277
- Macromolecules and biomembranes, enhancement of single sideband phase contrast interference, 51
- Medium, embedding, influence of, when staining for EM, 69
- Microanalysis in materials science, 113
- Micrographs, electron, image processing of, 343
- Muscle, cardiac, lipid losses during processing of, 41
- Non-spherical objects, section diameter method for, 61
- Nuclei, normal human, 277
- normal and malignant uro-epithelial cell, 291
- Optical microscopy, application of, to dust filtration, 211
- Paraffin-embedded neural tissue, meta-chromatic stain technique for, 97
- Phase contrast interference, contrast enhancement by, 51
- Phthalocyanine, copper, molecular image of, 261
- Polarization optical properties, method for measurement of, 251
- Processing of SEM specimens, more efficient methods for, 335
- Pyramitome, LKB, modifications to, 301
- Radioluminescence, β -method for detection of tritium, 195
- Renal vascular casts, 89
- Resolution, improved, in cathodoluminescent microscopy, 197

- Scanning electron microscopy,
 - air drying from organic solvents, in preparation of cultured cells, 21
 - preparation of human articular cartilage, 1
 - renal vascular casts, to more efficient processing of specimens, 335
 - versatile holder for processing and CPD of material, 349
- Scanning transmission electron microscopy,
 - nature of defocus fringes in images, 185
- Schockley, two-, unfauling of two- and three-layer faulted defects, 201
- Section diameter method for non-spherical objects, 61
- Sections, plastic, penetration of stains, 69
- Spray-freezing unit, inexpensive, for preparation of specimens, 101
- Stains, penetration of, into plastic sections, 69
- Stain technique, new metachromatic, for paraffin-embedded neural tissue, 97
- Standards, X-ray analysis without the need for, 79
- Techniques,
 - for EM autoradiography and X-ray microanalysis, 307
 - resin slide, to select fixed embedded cells, 325
 - ultra-thin sectioning, problem with particulate contamination, 317
- Thionin, metachromatic stain technique using, 97
- Tissue, paraffin-embedded neural, 97
- Transmission electron microscopy,
 - detection of ultra soft X-rays with a variable geometry counter, 31
 - resin slide technique to select cells, 325
- Tritium, method for detection of, in autoradiography, 195
- Ultra-thin sectioning technique, problems with particulate contamination, 317
- Uro-epithelial cell nuclei, normal and malignant, 291
- Vascular, renal casts, SEM, 89
- X-ray analysis without the need for standards, 79
- X-ray microanalysis, of diffusible substances using freeze-dried sections, 307
- X-rays, detection of ultra-soft, by means of a variable geometry counter, 31

Contents of Vol. 109

Part 1

| | |
|---|-----|
| Microscopy of Organic Sediments, Coals and Cokes: Methods and Applications—Introduction | 1 |
| ALAN DAVIS and FRANCIS J. VASTOLA. Developments in automated reflectance microscopy of coal | 3 |
| L. M. JUCKES and G. J. PITT. The standardization of petrographic analysis of coal | 13 |
| V. HEVIA and J. M. VIRGOS. The rank and anisotropy of anthracites: the indicating surface of reflectivity in uniaxial and biaxial substances | 23 |
| A. C. COOK and D. G. MURCHISON. The accuracy of refractive and absorptive indices derived from reflectance measurements on low-reflecting materials | 29 |
| N. H. BOSTICK and B. ALPERN. Principles of sampling, preparation and constituent selection for microphotometry in measurement of maturation of sedimentary organic matter | 41 |
| M. TEICHMÜLLER and M. WOLF. Application of fluorescence microscopy in coal petrology and oil exploration | 49 |
| F. T. C. TING. Microscopical investigation of the transformation (diagenesis) from peat to lignite | 75 |
| J. G. PRADO. Optical properties of oxidized vitrinite and exinite | 85 |
| B. N. NANDI, L. A. CIAVAGLIA and D. S. MONTGOMERY. The variation of the microhardness and reflectance of coal under conditions of oxidation simulating weathering | 93 |
| J. M. JONES and S. CREANEY. Optical character of thermally metamorphosed coals of northern England | 105 |
| M.-TH. MACKOWSKY. Prediction methods in coal and coke microscopy | 119 |
| J. W. PATRICK, M. J. SIMS and A. E. STACEY. Quantitative characterization of the texture of coke | 137 |
| D. CRAWFORD and H. MARSH. High resolution electron microscopy of carbon structure | 145 |
| S. SENGUPTA and M. D. MUIR. The use of light and electron microscopy in the study of experimentally altered spores and pollen grains | 153 |
| F. GOODARZI and D. G. MURCHISON. A note on spherical structures in chars from vitrinites of coking rank | 159 |
| R. K. HARRISON and K. E. BEER. Elateritic hydrocarbon from South Crofty Mine, Cornwall: a preliminary note | 165 |

Part 2

| | |
|--|-----|
| D. L. MISELL and I. D. J. BURDETT. Determination of the mass thickness of biological sections from electron micrographs | 171 |
| J. H. M. WILLISON and R. RAJARAMAN. 'Large' and 'small' nuclear pore complexes: the influence of glutaraldehyde | 183 |
| E. VARRIANO-MARSTON, J. GORDON, E. A. DAVIS and T. E. HUTCHINSON. Cryomicrotomy applied to the preparation of frozen hydrated muscle tissue for transmission electron microscopy | 193 |
| BACCIO BACCETTI and ANNA G. BURRINI. Detection of Concanavalin A receptors by affinity to peroxidase and iron dextran by scanning and transmission electron microscopy and X-ray microanalysis | 203 |
| ROLF F. BARTH, JOHN CLANCY, JR and JILL M. PUGH. Autoradiographic studies on the cellular uptake of Technetium-99m and Chromium-51 | 211 |
| S. K. CHAPMAN. A combined top and side entry specimen stage for a Hitachi H500 transmission electron microscope | 223 |
| JOHN MARSHALL and DAVID FAULKNER. A new semi-automatic device for autoradiographic coating | 227 |
| GODFRIED M. ROOMANS and HENK L. M. VAN GAAL. Organometallic and organometalloid compounds as standards for microprobe analysis of epoxy resin embedded tissue | 235 |
| C. A. VOYLE. Staining reticulin in beef dorsal lymph nodes for electron microscopy | 241 |
| BRENDA S. WEAKLEY. How dangerous is sodium cacodylate? | 249 |
| <i>Short Technical Note</i> | |
| KARL-OVE SÖDERSTRÖM. A simple technique for the phase contrast and acridine orange fluorescence microscopy of the same living cells | 253 |
| Book Reviews | 257 |

Part 3

| | |
|--|-----|
| F. P. OTTENSMEYER, J. W. ANDREW, D. P. BAZETT-JONES, A. S. K. CHAN and J. HEWITT. Signal to noise enhancement in dark field electron micrographs of vasopressin: filtering of arrays of images in reciprocal space | 259 |
| J. L. CHERMANT and M. COSTER. Quantitative analysis of particle growth in TiC-Ni alloys | 269 |
| W. A. DENCH, D. J. PUGH and C. T. H. STODDART. X-ray, light and scanning electron microscopy of manganese sulphide and lead inclusions in free-cutting steel | 283 |
| B. KWIECINSKA, D. G. MURCHISON and E. SCOTT. Optical properties of graphite | 289 |
| K. DEUTSCH and H. HILLMAN. The effect of six fixatives on the areas of rabbit neurons and rabbit and rat cerebral slices | 303 |
| L. A. BARRETT and R. E. PENDERGRASS. A method for handling free cells through critical point drying | 311 |
| P. S. BAUR and T. R. STACEY. The use of PIPES buffer in the fixation of mammalian and marine tissues for electron microscopy | 315 |
| S. F. STINSON and M. B. SPORN. Use of an automated image analyser to quantitate cellular hyperplasia in urinary bladder epithelium | 329 |
| <i>Short Technical Note</i> | |
| B. E. S. GUNNING and A. R. HARDMAN. Estimation of the average section thickness in ribbons of ultra-thin sections | 337 |
| Book Reviews | 341 |

Index of subjects

- Absorptive and refractive indices, accuracy of, 29
- Acridine orange fluorescence microscopy of living cells, 253
- Alloys, TiC-Ni, quantitative analysis of particle growth in, 269
- Anthracites, rank and anisotropy of, 23
- Autoradiographic coating, new semi-automatic device for, 227
- Autoradiographic studies on uptake of Technetium-99m and Chromium-51, 211
- Carbon structure, HREM of, 145
- Cells, free, method for handling during CPD, 311
- Cells, living, acridine orange fluorescence microscopy of, 253
- Chars, note on spherical structures, 159
- Chromium-51, cellular uptake of, 211
- Coal,
 - automated reflectance microscopy of, 3
 - and coke microscopy, prediction methods in, 119
 - microhardness and reflectance of, 93
 - petrographic analysis of, 13
 - petrology, application of fluorescence microscopy in, 49
 - thermally metamorphosed, optical character of, 105
- Coating, new semi-automatic device for autoradiographic, 227
- Coke and coal microscopy, prediction methods in, 119
- Coke, quantitative characterization of the texture of, 137
- Compounds, organometallic and organometaloid, as standards for microprobe analysis, 235
- Concanavalin A receptors, detection of, 203
- Critical point drying (CPD), method for handling cells, 311
- Cryomicrotomy, applied to frozen hydrated muscle tissue, 193
- Dangers of sodium cacodylate, 249
- Dark field electron micrographs of vasopressin, 259
- Electron microscopy,
 - beef dorsal lymph nodes, staining of, 241
 - micrographs, determination of mass thickness of sections from, 171
 - PIPES buffer in fixation of tissues, 315
 - use of, in study of spores and pollen grains, 153
- Enhancement, signal to noise, in dark field electron micrographs, 259
- Epithelium, urinary bladder, use of an automated image analyser, 329
- Exinite, optical properties of, 85
- Fluorescence microscopy, application of,
 - in coal petrology and oil exploration, 49
 - acridine orange, of living cells, 253
- Fixatives, 6, effect on neurons and cerebral slices, 303
- Glutaraldehyde, influence on nuclear pore complexes, 183
- Graphite, optical properties of, 289
- High resolution electron microscopy, carbon structure, 145
- Hitachi H500, TEM, combined top and side entry specimen stage, 223
- Hydrocarbon, elateritic, from South Crofty Mine, Cornwall, 165
- Hyperplasia, use of automated image analyser to quantitate, 329
- Image analyser, automated, to quantitate cellular hyperplasia, 329
- Inclusions in free-cutting steel, 283
- Indices, absorptive and refractive, accuracy of, 29
- Light microscopy,
 - manganese sulphide and lead inclusions in free-cutting steel, 283
 - use of, in study of spores and pollen grains,
- Lignite, microscopic investigation of the transfer from peat to, 75
- Mammalian and marine tissues, fixation of, by PIPES buffer, 315
- Manganese sulphide inclusions in free-cutting steel, 283
- Materials, low reflecting, reflectance measurements, 29
- Micrographs, determination of mass thickness of sections, 171
 - signal to noise enhancement in, 259
- Microphotometry, principles of sampling for, 41
- Microprobe analysis, of resin embedded tissue, 235
- Muscle tissue, cryomicrotomy applied to preparation of, 193
- Nodes, beef dorsal lymph, 241
- Oil exploration, application of fluorescence microscopy in, 49
- Optical properties of graphite, 289
 - oxidized vitrinite and exinite, 85
- Organic matter, sedimentary, selection for microphotometry, 41
- Peat, investigation of the diagenesis, to lignite, 75
- Petrographic analysis of coal, 13
- Petrology, application of fluorescence microscopy in, 49
- Phase contrast and acridine orange fluorescence microscopy of the same living cells, 253
- PIPES buffer, in fixation of mammalian and marine tissues, 315
- Pollen grains, experimentally altered, 153
- Pore complexes, influence of glutaraldehyde, 183

- Rabbit and rat cerebral slices, effect of 6 fixatives on, 303
- Reflectance measurements on low reflecting materials, 29
- Reflectance microscopy, automated, of coal, developments in, 3
- Reflectance of coal, variation with microhardness, under conditions of oxidation simulating weathering, 93
- Reflectivity, indicating surface of, rank and anisotropy of anthracites, 23
- Refractive and absorptive indices, accuracy of, 29
- Reticulin, staining of, in beef dorsal lymph nodes, 241
- Scanning electron microscopy,
 - detection of Concanavalin A receptors, 203
 - inclusions in free-cutting steel, 283
- Sections, biological, determination of mass thickness, from micrographs, 171
- Sections, ultra-thin, ribbons of, estimation of average section thickness in, 337
- Sodium cacodylate, dangers of, 249
- Spores, experimentally altered, 153
- Steel, free-cutting, manganese sulphide and lead inclusions in, 283
- Technetium-99m, autoradiographic studies on cellular uptake of, 211
- Tissue, cryomicrotomy, applied to preparation of, 193
- resin embedded, use of organometalloid compounds as standards for analysis of, 235
- TiC-Ni alloys, quantitative analysis of particle growth in, 269
- Transmission electron microscopy,
 - Concanavalin A receptors, detection of, 203
 - Hitachi H500, specimen stage for, 223
 - hydrated muscle tissue, preparation of, 193
- Vasopressin, signal to noise enhancement in dark field electron micrographs, 259
- Vitrinite, optical properties of oxidized, 85
- Vitrinites, of coking rank, spherical structures in chars from, 159
- X-ray microanalysis, detection of Concanavalin A receptors, 203
- X-ray microscopy of inclusion in free-cutting steel, 283
